

Lifetime Group

Building SaaS Platforms and creating value with Cloud and Edge's optimized solutions

As an independent digital consultancy with a truly global presence, Lifetime Group prides itself in offering solutions and co-piloting enterprise customers. Our World-class and results-driven cloud sourcing and delivery services make it easy to build SaaS Platforms and optimized digital twins.

Enterprise customers can now create more value on the cloud through near data, near energy and near security expertise we offer. We are the go-to copilots offering high quality consultancy and project portfolio management services for enterprise customers World-Wide.

Today, Lifetime Group has developed to become one of the world's leading independent international cloud consultancy that designs, develops, migrates and deploys SaaS Platforms and related applications and solutions based on Data, Artificial Intelligence and Machine Learning, Agile Project Management, creating customer value with secure DevOps pipeline on the Amazon Web Services AWS.

Some technical areas are No Code / Low Code App Development AWS Honeycode, AWS Amplify Studio with Figma, AppSheets Application Modernisation, Container build pipeline AWS CodePipeline.

Lifetime Studios is Microsoft Founders Hub Member company for our project DWS.

With enterprise clients at its reach in more than 120 different countries - and a scenario of USD 10 billion of digital assets under advice - The Lifetime Group aims to maintain its place at the forefront of the industrial cloud.

Lifetime Group's mission and purpose is to support our clients in creating, growing and safeguarding their digital wealth while reaching a competitive edge on the cloud.

We want to join you on your digital journey and make your dreams come true.

- Given the engineering at scale requirements (this global transformation project is enormous)
- developing sustainable global hydrogen ecosystem end-to-end with
- efficient Quantum ML/AI models and [Lifetime Digital Workspace Platform for its Fleet Management](#) to
- manage the new fleet to ensure and prevent climate change happening and going above 1,5 degrees rise of temperature, with a solution including

- 100 billion IoT streaming devices in the productions pipeline from hydrogen manufacturing (windmill farms, solar, nuclear, gas), logistics (motorcycles, cars, busses, airplanes, ships), storage (mines, underwater silos, battery packs), localizing (infrastructure and piping, gas stations), and finally turning hydrogen into electricity (devices, applications, appliances, services) at the right time and in the right moment and ensuring
- World-Wide availability of the solutions ecosystem when fully replacing Coal and fossil fuels.

How do we create value - Billions of Things and Trillions of Events

Every Enterprise is producing data, knowledge and experiences CX, EX, PX, OX, LX, UX, TX; both as a result of administrative processes and as part of their daily interaction with their customers and partners. In any space there will be billions of things that produce trillions of event data that needs to be managed on data lakehouse, and on DWS SaaS Platform.

Today, the data from experiences and knowledge is becoming an increasingly valuable asset, where one could create substantial actionable insight when the data is understood and leveraged to its full potential, ideally earlier and better than the competitors.

Lifetime Group together with its partner ecosystem is among the leaders in the deployment of data lakehouse technologies to manage billions of things and its intelligent containerized robots using Artificial intelligence and machine learning. The Technologies stack includes Kubernetes containerization, cloud native serverless microservices.

Supporting the transition to a digital and sustainable economy

Lifetime Group helps companies to turn this extremely valuable data into even more valuable knowledge assets and generate tangible business value from data and build in depth knowledge from it.

The Six Focus Areas to data-driven organization in the sustainable economy age

1. Engage your people - build a deep understanding of data by creating hands-on experience across the business with partnership certification programs guided by our advisors.

Lifetime Group

2. Hire the Best competency on the Planet - have access to a core people who understand and upskill the set of deep level AI expertise at their work daily to complement your subject matter experts.
3. Hybrid Data Strategy - have the right data collected, sorted and turned into in-depth knowledge available at the right time wherever needed, whether in-house, at customer location, at the device edge network.
4. Lifetime Certified Partners Consortium sorts and finds the best in class competency, augment companies on competency to secure the possibility to move all the way from proof of concept to scaled out production of AI solutions to bring out the real business value from data.
5. Have access to high quality data, not only in house, but also across the Corporation sites. Our data and value exchange platform Lifetime Digital Workspace gen. dws4 is specifically designed for enabling value-chains and ecosystems where industrial use-cases can happen and in which companies maintain control of their own data.
6. The Tooling experience TX with Artificial Intelligence (AI) and machine learning (ML) is growing in importance. At Lifetime Group we're building more and more amazing AI/ML solutions with mobile apps in automated DevOps hydrogen economy and hydrogen distribution logistics.

Let us help you on the cloud journey, call +358 400319010 Risto Anton today.

Lifetime Group

We are currently looking for insightful investors and are fundraising for dws41.

An investor with insight and passion, call +358 40031910. Thank you for being lifetime friends.
